tips

- ① Switch on the chair power and the indicator light is on
- ② Open the App on your mobile phone and connect Bluetooth
- ③ Automatically monitor data

## Smart Monitoring and Health Management

**Smart Monitoring**  
The cushion is equipped with a smart sensor which is used to monitor users' indexes such as pressure distribution, sitting time, heart rate and respiratory rate, etc. Through the data processing center, users can grasp constantly varied body data on a special App.

**Health Management**  
The purpose of data monitoring is to realize health management;  
The sitting posture and pressure index monitoring helps users cultivate good habits of sitting, thus benefitting the users both physically and mentally;  
The sitting time monitoring reminds users to avoid long-time working and spare some time to have a rest;  
The respiratory rate and heart rate monitoring helps users realize their health status and take timely measures;  
Winger truly serves users' health with science & technology and wisdom.
