"If we say that beauty and practicability is the eternal theme of design, innovation is the bridge between them."

Alegre Design is a world-renowned design studio with various international design awards and 15 plus years of experience in design. In 2016, upon the invitation of Sunon, Mr. Andres Baldovi of Alegre initiated a cooperative project aiming to create a dynamic office chair. After 2 years of dedicated work, here comes this innovative and trendsetting Hip Chair, a chair integrating art with technology.

A' Design Award Winner of Gold  
A' Design Award

Hip Chair

Hip Chair can dance! Just move your body.

### Superb in Shape, Exquisite at Heart

ADC12 aluminum alloy structure builds up a tough body while smooth curves are flowing through every detail. The trapezoid back frame echoes with the lines in headrest and the beautiful butterfly-shaped lumbar support perfectly and practically fits the curve of human body. Other exquisite details such as beveled armrest and polished aluminum alloy five-star base best illustrate the industrial craftsmanship in it.

**Hip, hip, hooray!  
Hip Hip-Chair!**

You might have never noticed how constantly your sitting mode is changing. That is the freedom and dynamics one needs in work for immediate, personalized comfort. Hip-chair, with minimal swing angle of 10 degree in both left and right sides, guarantees instant response to your body, movement and posture.

SWANKY OFFICE FURNITURE

### Base and Back, Move as One

With the joint effect of Italian Donati weight-activated base and the 3-point coordinated control mechanism, the movement of base and back in Hip Chair is synchronized and closely fit every move of your body.

### Sit in Whatever Position You Like

4

The 4D armrest could get adjusted in multiple dimensions such as height, depth and direction, and provides firm support to your arms, which helps ease the pain in your neck and shoulders caused by continuous use of electronic equipment with your head down.

60mm

Height adjustable within the range of 60mm

Rotatable to left and right up to 20°

35mm

Movable to back and forth within the range of 35mm

10mm

Adjustable to left and right with in the range of 10mm

### One Chair, Multiple Experiences

You sitting position changes as you shift among smart phone, table device and computer screen; meanwhile, your spinal curve varies when you adjust from sitting up straight, leaning against the back to communicating over a desk. In any of these circumstances, the smooth curve of Hip chair's backrest constantly and always conforms to your spine, ensuring a day of balance and comfort.

90° , 还原专注办公模式;  
90°, for working concentrately;

120° , 解放身心, 调至最佳姿势。  
120°, for adjusting to a relaxed state.

#### Invisible Switch, Easy to Operate

The special adjust-by-wire mechanism in Hip Chair tactfully integrates the adjusting button to its appearance so that the adjustment of seat depth, height and tilting angle could be realized with one simple stretch.

### A Short Nap Makes the Day

We work like those wound-up clocks, shuttling among endless meetings and countless reports, and might have forgotten appropriate rests would enhance efficiency. Hip Chair, with tilting angle up to 129°, could offer you a 30-minute nap and high efficiency for the whole afternoon.

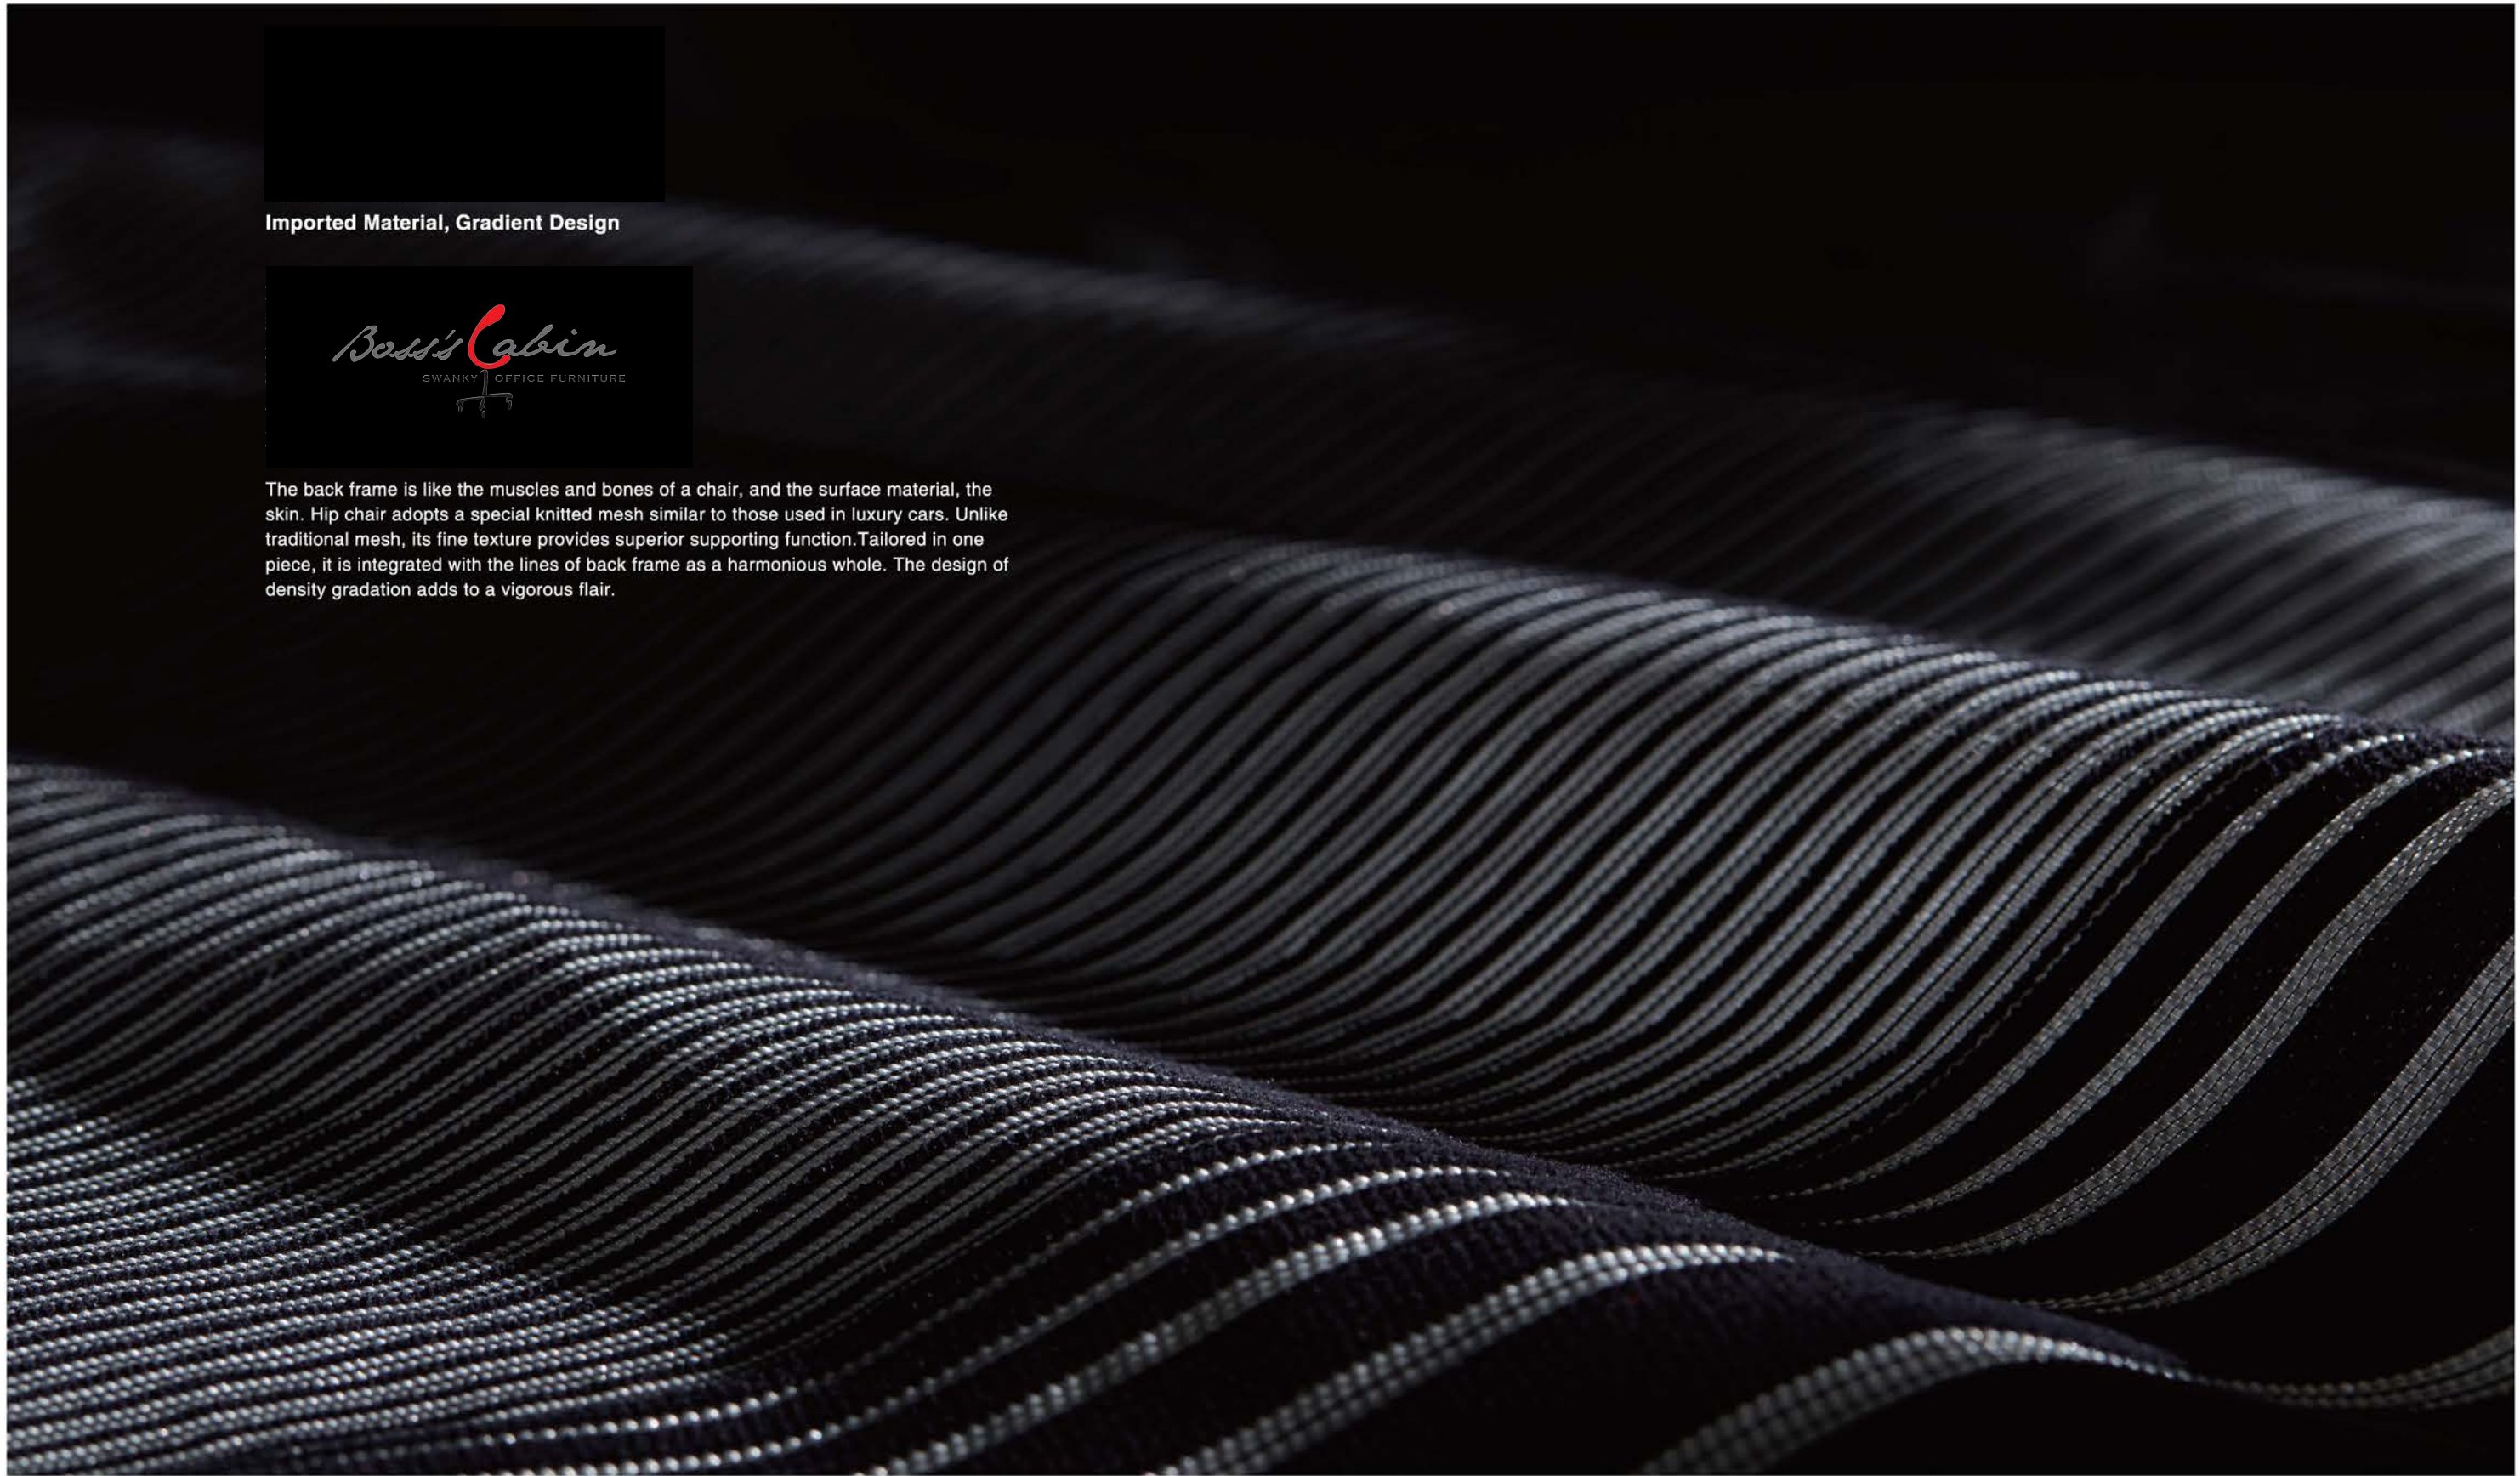

Two-tone yarns interweave to outline the gradual visual effect. Be it a wood-color or color-painted desk, Hipchair is always a good match to go with.

### Imported Material, Gradient Design

The back frame is like the muscles and bones of a chair, and the surface material, the skin. Hip chair adopts a special knitted mesh similar to those used in luxury cars. Unlike traditional mesh, its fine texture provides superior supporting function. Tailored in one piece, it is integrated with the lines of back frame as a harmonious whole. The design of density gradation adds to a vigorous flair.

Headrest

30mm    20°

Height Adjustment Range: 30mm    Rotation Range: 20°
