It is the agility and stability that we cherish;
It is the craftsmanship and ingenuity that we always hold dear.

A gentleman never casts away his initial heart of craftsmanship while accomplishing his cause.

Carpenters use line marker to craft classic masterpieces;

Ingenuity is the ruler of gentleman to perfection.

Craftsmanship hidden in every detail of a work of art. It seems to be found in nowhere, but there are traces to follow.

For 186 days of production with 79 processes including thousands of times of manual polishing, from the straight line to the corner, each detail of Round series blossomed with the handicraft beauty that can never be achieved by mechanical production.

**As nature progresses mildly,
a gentleman acts in a modest and refined manner.**

A gentleman shows the tenderness in personality as well as the deliberation in dealing with changing situations. Round series integrates elements of uprightness and roundness, turning hard-edges into modesty and humbleness. Smooth touch obtained from manual polishing sends out elegance given by time.

Master carpenter's ruler is used to meet natural law with natural walnut.

The desktop is 7.8-foot in length, which means good fortune in the business development;
The desktop is 3.3-foot in width, which means good fortune in the communication and negotiation;
The arc edge of the desktop is 0.8-foot in width, which means good fortune in job promotion.

You can find natural color matches in Round series. The classical color of the earth reminds you of the charm and freshness of mountains and rivers in cloudy moist, making you feel its elegance and vintage. The low-saturated neutral color is low-key and calm, which allows you to find the inner peace to relax and broaden your vision.

45° Side Vision Presents Uprightness and Roundness.

A masterpiece with excellent aesthetics is expensive not only in materials and techniques, but more in strict size and perfect proportion. Round series follows the golden ratio with Luban ruler used as the rope ink.

25 years of experience represents exquisite craftsmanship. Auspicious numbers are used to bring more good wishes to light your mood in work.

Under the Desk Top, A Whole New Vision.

Grafting old crafts with new technology, in addition to flowing lines and staggered structures, both internal and external functional configuration are strengthened.

Hidden routing system with multiple ports for telephones, HDMI, and USB, sufficient for power charging for different devices.

Good design speaks in unobtrusive details.

Turn complexity into conciseness, ingenuity is hidden everywhere.

Creation is made according to the original texture of the wood without any complicated carvings.

It exudes the quaint texture after years of precipitation.

Calm down and breathe, hundreds of times of calibration and adjustment ensure no single error exists.

Edges of the Cabinet door have a 45° inward cutting angle, uniformly merged with the cabinet surface.

The large capacity storage space is sufficient for your daily needs.
