LINZ views changes of the world from an inclusive perspective. Flexible yet practical, it grows with your company.

The 2886 mm desk of LINZ perfectly divides reception area and working area. Its minimalist white color mixes with the gentle wood color, creating a visual impact of contrasting colors. Small things can make a big difference: with hidden divided grids, storage is as easy as pie, be it for books or decorations; with hidden cable routing system, the reception work is always well-organized.

Being transparent and open is a key feature of a modern office, which echoes with the two key indicators of corporate management: openness and inclusiveness.

Classic square understructure, sedate yet majestic, leaving ample space for your legs to move with ease. Side cabinet with large storage capacity is available for choice. You could put all your bags, clothes and books in, making all necessities within reach.

The main and side desk of different heights divide the working area. Semi-open back cabinet, classic yet functional, is a perfect choice to display upscale collections or store personal items. The heightened desktop together with suspension board leaves sufficient space for office equipment. The design of handleless sliding door carries minimalism into details. Flip cable box clears away the messiness of wires, making your work more efficient.

How could we plan office space so as to keep up with the pace of corporate development? Try LINZ, flexible enough to get prepared for future growth.

SWANKY OFFICE FURNITURE

Work related to finance and administration has higher requirements on storage and privacy, and that's where LINZ excels. L-shaped workstation greatly improves desk surface utilization. Paired with desktop screen, it forms an independent space, blocking disturbance and improving concentration.

For marketing specialists, racing against time is a normal work status. This calls for a more concise and flexible workstation to make the best of teamwork as well as space.

Among the various kinds of desktop screens, select one that fits your desk best. Sturdy plate, acoustic felt, cozy mesh and transparent acrylic: all these materials are available, and they come in varied size, thickness, and colors, catering to diversified demands.

The metal understructure of LINZ is wear-resistant and anti-corrosive, with high precision and a fine matte coat. The desk adopts 45-degree beveled technique at the bending part and guarantees its stableness with welding and polishing. LINZ always focuses on details.

The wire box exclusively designed for LINZ makes desk top clean and neat with its hidden cable routing system. A 20cm gap between strong and weak electric routes ensures no interference in power supply and signal.

Sharing, cooperation and interactivity: these are all what the workspace could bring and would encourage.

Collaborative meeting space encourages more team members to join in. With a maximum length of 3.6m, LINZ meeting table could accommodate 8-12 people at one time, and one still gets plenty leg room.

Communication or inspiration could happen anywhere, hence the indispensability of small negotiation tables. Concise and flexible, they fit in all kinds of discussions and all sizes of space.
